REACT ROUTER

Crear la app.
Instalando paquetes
Para el router: https://v5.reactrouter.com/web/guides/quick-start
$$> npm i react-router-dom
Para los componentes con estilos: https://styled-components.com/docs/basics#installation
$$> *npm install --save styled-components*

Rutas
Creando componentes:

En App.js:

```
import { BrowserRouter, Routes, Route, Link } from "react-router-dom";
import Blog from "./components/Blog";
import Home from "./components/Home";
import AcercaDe from "./components/AcercaDe";
import Error404 from "./components/Error404";

const App = () => {
return (
<BrowserRouter>
<div>
<header>
<h1>Blog Personal</h1>
<Link to="/">Inicio</Link>
<Link to="/blog">Blog</Link>
<Link to="/acerca-de">Acerca De</Link>
</header>
<Routes>
<Route path="/" element={<Home />} exact={true} />
<Route path="/blog" element={<Blog />} />
<Route path="/acerca-de" element={<AcercaDe />} />
<Route path="*" element={<Error404 />} />
</Routes>
</div>
</BrowserRouter>
);
};

export default App;
```
